

Modular Ice Flakers - SPN Range

FEATURES

- High grade 441 stainless steel (scotch brite) exterior
- Food safe plastic interior
- Front vented - can be built in
- Electronic controls
- Produces flaked ice - the residual water contents for Super flakers SPN405 and above is 15%
- Air cooled (water cooled version available)
- Easily accessible components
- Refrigerant R134a (SPN125), R404a (SPN255, 405, 605, 1205)
- Built in cleaning system

**441
STAINLESS
STEEL**

Residual water content 25%

It is most important to have a water filter in line with your Ice machine. Without a water filter as ice is produced the remaining cold water in the machine becomes more and more concentrated with calcium etc. This calcium deposits on the components inside the ice maker, putting a coating on the evaporator and causing pumps to fail. More electricity is required to produce ice when the evaporator is coated with scale and eventually an expensive service call will be required, which is chargeable.

Remember, Fit a water filter in line with your ice machine, run a cleaning solution through your machine regularly, and clean the condenser regularly. Following these simple procedures will give your ice machine a long and economical life.
